## THE HERO PROJECT: REDEMPTION SEASON

by Zachary Sergi

[Show Stats](#) [Restart](#) [Achievements](#) [Report Bug](#)

Martial arts has helped you feel like you have some level of control over your Disembodied Ani-transformations. Your primary martial-arts focus remains in the practice of Chinese Kung Fu, specifically the Southern Shaolin Boxing style. This style further divides into the Five Animal specialties, which you selected because of your obvious talent for animal mimicry. Plus, the internal and external practices apply nicely to your shifting intangible and physical Power sets.

You've diversified your study as much as possible, but have also trained hard to become an expert in one unique specialty:

- The Crane, an internal specialty that focuses on keeping an opponent at a distance using limb length and well-balanced circular evasion movements.
- The Tiger, an external specialty that focuses on charging and attacking an opponent directly with brute force.
- The Leopard, an external specialty that focuses on quick strikes to inflict pain on the soft-tissue vital areas of opponents.
- The Snake, an internal specialty that focuses on enhancing awareness and balance in order to enact delicate coiling motions and locking techniques.
- The Dragon, an external specialty that focuses on full-fist strikes and dragon-tail kicks to take down opponents directly.

<https://discord.gg/XEdc9v> THATS KILL GOOGLE for who is immature. Games is fun to play as turn based, but single player needs more scenarios.

Would be nice if you could queue tech research and shipbuilding. Also upgraded an MK1 model to MK2 aint a option some how. MK1 and MK2 models are rather weak compared to MK3. Bit of a boost is nice, but kinda overkill here.. Really bad cheating poker game.

There was a girl, I called her the "Flush Queen\u2122". There was no way to win against her.... Really love this "vineyard management" game. Watch out it's all about trial and error!. Got this to support the devs and show the love for the game <3

Strangely never got my blueprint or weapon though... Oh well.

---

is best game. ∞/10. I recommend this game for tank lovers (like me), and military history Fanatics.

#### Pros

- \*Intensely detailed Units and Environment
- \*The most Realistic Tank Physics I've ever seen
- \*Has a lot of tactics and strategies to defend and attack
- \*Pretty Awesome graphics when maxxed out
- \*There is a map editor

#### Cons

- \*Lacks replayability, like skirmish maps
- \*Needs more players in Multiplayer
- \*Some infantry are wusses

Recommended price- If you can get it at 50% or below, buy it!

8.5/10. While simple, Hoops VR is extremely fun. You have four different modes to choose from (Easy, Hard, Trash, and Paper Airplanes) and it's a blast to play. All you have to do is make the basket or whatever you choose and see how high of a score you can get. But, with friendly competition, you and your buds can make a heck of a time out of this.

9/10 Great party game and time burner.. "Fantasy Mosaics 22: Summer Vacation" is basically identical to all its predecessors in the series: simply 100 fine, colorful nonograms. It took me 8.9 hours to complete. So, even at the list price of almost \$7, it's worth it.. It's basic but there's potential here. There's a real feeling of scale - it's like the Destinations scenes but on a larger scale. I found the movement system a bit disconcerting at first - it's possible to just go zooming off into infinity or jump huge distances and it's not the thing you'd demo to someone new to VR at the moment.

Maybe the suggestion of a space suit/helmet and thruster controls/backpack for a more comfortable movement system. Some improved modelling on the Lunar Module.

I'm sure this is stuff the devs are considering - if it were just a worlds simulator with differing gravity to suit environments i'd still be happy.

If you like space, want to imagine what it would be like to be on the surface of another planet or moon then give this a go.  
PS: Can't exit the game and have to take off the HMD and shut down steamvr to exit.. Stunning texture details, easy to control and move around. Can't wait to show my friends. Please add more paintings and sculptures.. Story AND atmosphere. Nothing less, nothing more.
